

DK EXTROVERT

**DOUBLE PHOMA
RESISTANCE**

**POD SHATTER
RESISTANCE**

**VIGOROUS
ESTABLISHMENT**

**RAPID AUTUMN
DEVELOPMENT**

**GOOD LIGHT LEAF
SPOT RESISTANCE**

DK Extrovert is one of the most robust varieties we have ever seen. Fast development in the autumn and spring allows it to grow away from pests whilst RLM7 stem canker resistance combines with a high level of light leaf spot resistance to defend against disease. This outstanding hybrid also benefits from high oil content and pod shatter resistance to deliver a very high gross output potential in a crop of moderate height and relatively early maturity.
